

ADARSH KUMAR

+91 9581420398 | adarshk.main@gmail.com | [LinkedIn](#) | [Github](#) | akn714.github.io

Versatile software developer with strong foundations in computer science, experienced in building scalable web and AI-driven applications using modern technologies, with hands-on exposure to cloud deployment, machine learning, and full-stack development.

EDUCATION

Dr. APJ Abdul Kalam Technical University | Lucknow, UP

2022 – 2026

B.Tech in Computer Science and Engineering

CGPA: 8

Sarvajanik Vidhyalaya Daman | Daman, Daman

2021

Senior Secondary Education

Coast Guard Public School Daman | Daman, Daman

2019

Secondary Education

WORK EXPERIENCE

Hashedbit Innovation

Jun 2025 – Sep 2025

Full Stack Developer Intern

Gurugram, IN

- Developed and maintained frontend and backend features for a live e-commerce platform using React.js, Node.js, Express.js, and JWT-based authentication, including secure image uploads and role-protected APIs.
- Collaborated in an Agile team to debug, test, and optimize application performance, utilizing Git/GitHub, Postman, and Jira to deliver production-ready features on schedule.

Stealth Startup

Jul 2023 – Nov 2023

AI Engineer (contract based)

(remote) Florida, USA

- Engineered AI-drive solutions leveraging Retrieval-Augmented Generation (RAG) and integrated OpenAI API into Discord bot, scaled the bot to handle discord channel of 1000+ of users.
- Deployed AI service on AWS Lightsail, utilizing Docker for seamless deployment and Pinecone vector databases to improve data retrieval efficiency.

SKILLS

- **Programming Languages:** Python, Java, Javascript, C/C++, Bash/Shell Scripting, SQL.
- **Web Dev:** MERN Stack Development, FastAPI, Next.js, Typescript, Microservices, MongoDB, PostgreSQL, Supabase.
- **AI/ML:** Natural Language Processing (NLP), AI Agents, Langchain, Machine Learning, Deep Learning, Generative AI, Pandas, Scikit-learn, Numpy, Matplotlib, OpenCV.
- **Cloud & DevOps:** AWS Lightsail, Docker.
- **Tools & Libraries:** Socket.IO, Flask, Telegram SDK, Discord SDK, Mongoose, Git, Github.

PROJECTS

ML Based Web Application Firewall | [Github](#)

Dec 2025

- Designed and implemented a machine learning based Web Application Firewall to detect malicious HTTP requests beyond traditional rule-based methods. Extracted and engineered features from web traffic and trained LogisticRegression model to identify attacks such as SQL injection and XSS. Integrated the ML model into a proxy-based request inspection pipeline for real-time detection.
- Tools & Tech: NLP, Brup Suite, Scikit-learn, Pandas, NumPy, FoxyProxy.

Rocket07 Online Delivery Service System | [Live](#), [Github](#)

May 2026

- Developed a full-stack online delivery management system with FastAPI backend, Supabase PostgreSQL database, and Telegram Bot integration for real-time order notifications and tracking.
- Tools & Tech: FastAPI, Supabase, PostgreSQL, Python, Telegram Bot API, Pydantic.

V-Doc: AI Medication Assistant | [Github](#)

July 2023

- Built an AI-driven virtual doctor using Python and React.js, leveraging RAG (Retrieval Augmented Generation) with LangChain, OpenAI API, and Pinecone for efficient decision-making.
- Tools & Tech: OpenAI API, Langchain, Pinecone DB, React.js, Python.

Colx: College OLX Platform | [Live](#), [Github](#)

Aug 2023

- Developed a full-stack marketplace platform enabling students to buy/sell items, report lost & found, and raise hostel maintenance complaints.
- Tools & Tech: Node.js, Express.js, React.js, MondoDB.

ACHIEVEMENTS

- 3-Star rated on CodeChef with 1600+rating.
- Certified 5-Star rated in Python Programming, Problem Solving, JS and Java on HackerRank.
- 1000+ rating on Codeforces.
- Ranked among top 10% hackers on TryHackMe.
- Gate CS 2026 & Gate DA 2026 Qualified.
